

Colab is Australia's leading Oracle e-Business Suite (EBS) and Technology services provider, focused on the Oracle Human Capital Management suite of products.

End-to-end  
innovative  
consulting  
solutions & support

With an inherent focus on maximising return on investment, achieving business benefits realisation and lowering the total cost of ownership, Colab offers the following services:

- + Definition and execution of a strategic roadmap and business case that meets your enterprise requirements, lowers risk and enhances your return on investment through targeted business benefits realisation.
- + Plan, manage and assess your project implementation or upgrade
- + Deliver your project based on a standard business flow model, implementation toolkit and enhancements that accelerate the project timeline, reducing cost and risk on delivery.
- + Manage, support and enhance your current Oracle EBS solution, with a focus on delivering holistic recommendations and solutions on a strategic as opposed to tactical level with a focus on operational self-sufficiency through knowledge transfer and mentoring.
- + Deliver bespoke applications that seamlessly integrate and enhance the standard Oracle user experience.

## WHY US?

Accelerate project  
delivery, lower cost of  
ownership, enhanced  
user experience

### EXPERIENCE

Our people have been working with Oracle HCM prior to Australian localisation in 1999 and have been instrumental in the successful delivery and support of the largest and most complex Oracle EBS implementations delivered in our market to date.

### THE COLAB METHOD

The Colab Method is our best-of-breed project methodology consisting of a business process library based on Oracle Business Flows tailored to the local market, solution design templates and automated configuration tools for end-to-end project management and implementation.

### COLAB SOLUTIONS FRAMEWORK

The framework is a family of tools, templates, enhancements and bespoke products inherently integrated with The Colab Method that accelerates the implementation timeline, allows for a simplified future support model, delivers a rich end user experience; all contributing to a lower cost of delivery and ongoing ownership.

Advisory, application,  
upgrade & technology  
services

Colab Consulting offers business consulting across Advisory, Application, Upgrade and Technology services, concentrating on delivering value to our customers through tailored Oracle EBS solutions.

Through the use of templated, best-practice solution design, utilising proven methodology, reusable automation toolsets and enhancements, we are able to focus on meeting your unique organisational requirements.

Our proven experience contributes to the success of each engagement, exceeding expectations and delivering solutions that enable controlled, automated and efficient business processes.

Bridging the gap  
between Oracle  
and local market  
requirements

Colab Solutions focuses on developing Colab Enhancement Layers (CEL's), validated-solutions that wrap seamlessly around Oracle EBS. With a focus on bridging the gap between the standard Oracle offering and local market requirements, our innovative solutions add further efficiencies to Oracle's best practice business flows; through enhancing the user experience, reducing the need for technical support - contributing to a lower cost of ownership.

Strategic,  
preventative,  
proactive and holistic  
approach

Colab Support operates under a model that is proactive, scalable and competitively priced. Our focus is to ensure your Oracle EBS will be not only be vigilantly maintained but continually enhanced, by taking a proactive and holistic view to all of the advice and work that we perform in both support and development. We will empower your team through transparently transferring our knowledge through continued mentoring at all levels of our engagement.

Our objective is to stabilise and enhance your current platform to establish confidence in the system by delivering timely and accurate information supporting current and future business processes and managerial decision-making.

# OUR PEOPLE

Tier 1 Industry-  
recognised  
Client-peer reviewed

Colab is privately owned and directed by Oracle HCM industry veterans. Our principals have all worked for globally recognised Tier One professional services firms, as have all of our team.

We are proud of our people. Our consultants, all permanent employees based onshore, are industry-recognised as the best in the market. They have delivered robust solutions for a broad range of clients across varied industries both locally and internationally. They live our values and pride themselves their currency of skills resulting in excellence in thought and excellence in service.

Ultimately this translates into enhanced service levels for our partners through innovation solutions and accelerated issue resolution, particularly relevant to critical enterprise applications.
